The Island King is a melee weapon used by Monica Raybrandt in Dark Chronicle. It builds up from the Griffon Fork, the Sword of Zeus, the Shining Bravado or the 7th Heaven. It doesn't come with any ability. The Island King has the highest Attack of all swords in the game, with Dark Cloud and Muramasa in second place, while having higher elemental stats and attack speed respectively. Island King boasts high elemental stats across the board making it comparable to Max's LEGEND.Although it has a slow four-hit combo, like the Sword of Zeus, Island King's brute attack power is unmatched by any other sword. This sword is only obtainable through the build up system and cannot be found in chests, nor can it be invented or bought.Attributes[AttributesMinimum150890000200200200200Maximum50099250250250250250250250 Game Trivia PS2 The theme played during the extra boss battle in this game is a slight remix of the main theme from the original Dark Cloud title. Monica Raybrandt is an agile attacker, and can charge her attack to jump in the air and slash down. Her blades eventually gain the Magic Absorb Blade ability, which lets her absorb elemental attacks while guarding with , and release them back at enemies using , similar to her ranged attacks. The attacks that have been absorbed are stored as charges, denoted by circular slots around the outside of her weapon's WHP meter, which light up with the colors of the attacks's element that have been stored. This ability is gained the first time Monica blocks an elemental attack. The earliest it is available is in the Rainbow Butterfly Wood, when first facing a Fire or Ice Elementenemy. The amount of slots is dependent on the weapon's total Durability attribute, with the minimum of three being unlocked at 32. Each subsequent 16 points add one extra slot, up to a maximum of 7 at 96. Her sword can only absorb one element type at a time, meaning that if she has three fire charges and absorbs an ice element, she loses the former, leaving only the latter. Charges are indicates by their color (red, blue, green, yellow). Absorbing an elemental attack reduces the damage from that attack to zero, but she cannot absorb non-elemental attacks, such as the goo from aHimarra, the stop from aStick Joe, or the poison from aStormy.Even before the ability is gained, pressing while Monica guards will allow her to perform a quick melee strike, which can prove useful when up close to a strong enemy. Charges are not guaranteed to land even if the target is locked onto, and are less likely to land in close proximity, since the trajectory of the charge mimics the magic from Monica's brassards, and also somewhat vary by element. Flame and Chill charges tend to be pretty direct, while Cyclone and Lightning charges have wider cones of deviation before homing in on their target. The actual damage of a charge is solely derived from the enemy's absorbed attack's stat, with each charge adding more of that same stat to the attack once it is used. Returned attacks are still affected by enemies' defense, vulnerabilities, and strengths, since the charges count as an elemental attack of the magic type. They are also granted a bonus 100 points in their own respective element, ensuring more damage if the attack is used on something weak to it (usually not the same enemy however). See More or Submit Your Own! Games You May LikeDark CloudRogue GalaxyKingdom HeartsKingdom Hearts IIShin Megami Tensei: Devil Summoner - Raidou Kuzunoha vs. the Souless Army Although it never achieved the popularity of Final Fantasy, I have to say Dark Cloud does sport some amazing reviews. Its initial launch in Japan wasn't met with much love. But it did become a commercial success and went on to have a sequel (Dark Chronical or Dark Cloud 2 depending on region). As with any dungeon-fighting title, weapons are a rather important element. One of the unique features of the title is that the weapons themselves level up rather than the character. With that in mind, weapon choice is crucial. The game has a whole selection of different battle tools and while personal preference is a huge factor when it comes to what is the best, Im going to evaluate my favorites from all of Dark Clouds weapons in terms of aesthetics and power. Lets dive in!10. AlbatrossMaximilian has a reputation for less conventional weapons and his series of bird-themed clubs fit right into this category. Unfortunately, aside from a very loosely inspired color scheme, the weapons arent really bird-themed at all. Fun fact: in real life, the Albatross bird has the longest wingspan of ANY living bird reaching lengths of to 12 feet!OK back to gaming. This specific weapon happens to be the final form of the Spheida club path. It works with advanced swings and does deliver the most damage compared to its earlier makes. It is important to note that clubs, in general, are not suited for the smaller dungeon rooms. But for those who insist on trying to use clubs, this is your best bet!9. Frozen TunaOne of Goros and Maximilians weapons, it is not at all misleading by some of the other zoologically weapons in the series. It is totally face value. Just a giant frozen fish that can be slammed against enemies and is later built up into the turtle shell weapon. Cute. 8. Stinger Wrenchl love originality in weapons and Maximilians series of wrenches really take the cake. Ive seen hammers and saws being used before, but I cannot think of any other game that has used a wrench as a weapon. Although this isnt the tools strongest form, it has a lot of awesome attributes for a rather early weapon. For one thing, the steal ability is awesome. And it has the potential to be synthesized at level five like the Bandit Brassard (one of Monicas ranged weapons) to pass this ability to another main weapon. Battling aside, this weapon is a steampunk lovers dream. The color combination mixed with the spiked-gear upgrade certainly separates it from the boring old wrench on a construction site. 7. EvilciseThis weapon is of a rather low-tier in the game, but that doesnt make it any less awesome. This sword is one of Toans weapons in the original game and can fall into the hands of Monica Raybrandt in the sequel. Even if it is a little slow and doesnt pack as much of a punch as other weapons, I am a huge fan of dishing out status effects. In Dark Cloud 2 it has a poison ability which makes it just that much more useful.Not to mention the strangely colorful and rounded design makes me feel like this weapon popped out of the Soul Eater series. 6. Dark CloudAnother weapon shared by Toan and Monica, this bad boy is present in both titles. With its red and black color scheme it certainly looks awesome. When a weapon name matches the game title its always something special. It is, in fact, a high tier weapon that can deal a lot of damage with its impressive 6-hit combo. Sadly, its elemental stats arent great. And its elemental stats can prevent it from being as effective as other swords in the series. Although this is an ultimate weapon in Dark Cloud 2 and cannot be further built, it does have a final form as it is a penultimate weapon in the original! 5. Star BreakerIf this gun was colored differently it could belong to buzz lightyear. In the Dark Cloud series it has Captain America colors and belongs to Osmond(in Dark Cloud) and Maximillian(in Dark Cloud 2). As an American I have this inexplicable attraction towards red, white, and blue color schemes with stars. Aesthetics aside, the gun itself is pretty cool and the first machine gun that Maximillian can actually use. This means that they are both faster and fully automatic, making it a special milestone for gun users in Dark Cloud 2.4. InfernoAnyone who has ever watched D.Gray-man knows that you can never underestimate an elemental hammer. In the Dark Cloud series this weapon is wielded by Goro and is his strongest weapon (after being built up from Satans Axe). A giant battle hammer constructed from the flames of hell speaks for itself. What could go wrong?3. Athenas ArmletAthena was the Goddess of war in ancient Greek mythology. She is easily one of the most recognized Greek entities as she has been made rather prominent in pop culture. Same holds true in the Dark Cloud series where she has become an awesome, face-shaped battle bracelet for Monica. Although it is not all that balanced, it has high Flame and Exorcism stats that make it quite powerful.2. Island KingThe Island King is one of Monicas ultimate swords. Meaning as a super powerful tier-9 melee weapon. Its adorable and tiki inspired design makes it really stand out and feel quite unique. It only has a slow 4-hit combo but it is the strongest sword in the game when you just look at brute attack points. This is also one of those weapons you cant buy or earn, you need to build up to get it. 1. Chronicle 2This is Toans strongest weapon in the original(and later becomes a high-tier sword of Monica in the 2nd installment). The sword has a look that really screams powerful and boasts one of those cool designs with a hollow center illuminated by a blazing light. In the original game this is a prize you can only obtain by defeating the Black Knight Pendragon on the 100th floor of the bonus dungeon Demon Shaft. So if you want to score this bad boy youll need to put in the work! File:Placeholder Template:QuoteWeapons are objects that can be used in battle by Maximilian and Monica to maim or seriously injure monsters in the dungeons. Max can use Wrenches and Guns while Monica can use Swords and magical Armlets.Weapons gain Synthesis Points when enough ABS has been collected by a character, and the player can build up attributes such as Attack, Durable, Flame, Chill, Lightning, Cyclone, Smash, Exorcism, Beast and Scale by Synthesysing crystals and attaching them to the weapons.The weapons in bold are the final weapon that they can possibly be, the ones in capital letters are the best weapons.
