Geometry Dash suddenly stutters and FPS drops? Well, who will not be annoyed if youre in the mid-game and you experience this issue? While the developer
of Geometry Dash has been properly optimizing the game, it seems that your PC is having some performance issues with the game. Worry not, as we will guide you to fix these problems in Geometry Dash. To fix the Geometry Dash lag, sudden FPS drop, and stuttering, feel free to try all the recommended steps below. Update Graphics Driver Updating
your graphics driver should always be your go-to option when your concern is Geometry Dash FPS issues. Sometimes, you forget to update your drivers manually, resulting in your PC being outdated. Well, no wonder why youre experiencing these FPS problems in Geometry Dash. According to the official driver release notes from AMD and Nvidia,
both of these popular graphics card manufacturers provide optimal support for Geometry Dash. If youre not sure if you have the latest driver, you can download and install Driver Booster to automatically download and install Driver Booster to automatically download and install Driver Booster and
click the Scan button. The Driver Booster will then scan and detect any driver-related problems. Step 3: Click the Update Nowbutton to automatically download and install the correct drivers for your computer. Step 4: Restart your PC for the update changes to take effect. Step 5: Start Geometry Dash and check if these crashing issues have been
solved. If the Geometry Dash crashing problem persists, proceed to the next step. Use Game Booster, then you can take advantage of its amazing feature: Game Boosters Game Boost. This feature will surely boost your overall FPS while playing Geometry Dash. For a better gaming experience, Driver Boosters Game Boost.
feature will temporarily stop all unnecessary applications and services running in the background. If you want some applications to be active while Game Boost is enabled, you have the option to configure the feature. Disable Steam Overlay If you have the option to configure the feature.
try disabling the Steam Overlay for Geometry Dash. Heres how you can disable the Steam Overlay: Open Steam and go to LibraryRight click on Geometry Dash to see if you achieve a better FPS. Set Geometry Dash to High PriorityThis
method will allow your system to prioritize and allocate more resources for Geometry Dash, resulting in a better framerate. To set Geometry Dash to high priority: Open Geometry Dash to high priority: Open Geometry Dash to high priority Dash, resulting in a better framerate. To set Geometry Dash to high priority Dash to high prio

the settings section of the game. Feel free to experiment with the graphics options inside Geometry Dash. Play Games. Earn points. Get gift cards! Playback Rewards (13.7k) 500k players and counting... Creating Gulfa year agolf you're still having trouble with FPS after trying everything, it might be time to look at your hardware. Geometry Dash isn't
super demanding, but if you're running it on a really old system, even the simplest games can struggle. Upgrading your hardware, even just the graphics settings. You can do this by going into the game's
options and adjusting the detail and background graphics to a lower setting. Also, close any background apps that might be eating up your CPU or GPU resources. Geometry Dash doesn't require a lot of power, but having too many things running can slow it down. Lastly, check if your graphics drivers are up to date. Out-of-date drivers can cause a lot
of performance issues!Playback Rewards - a great rewards app for your favorite brandsDiego3 hours agoIf you're a Geometry Dash player looking for extra stars or other power-ups, you need to download the Playbite app!Playbite is like an arcade in your phone: you get to play all kinds of fun and simple games, compete with friends, and win cool
prizes from all your favorite brands!Two of those prizes are the official App Store and Play Store gift cards, which you can win and use to get anything you want in Geometry Dash essentially for free!In case youre wondering, this is how it works:Playbite makes money from (not super annoying) ads and (totally optional) in-app purchases. The app then
uses that money to reward players like you with prizes!Download Playbite for free, available on the App Store!The brands referenced on this page are not sponsors of the rewards or otherwise affiliated with this company and/or
its affiliates. Please visit each company's website for additional terms and conditions. Share copy and redistribute the material in any medium or format for any purpose, even commercially. The licensor cannot revoke these freedoms as long as you follow the

This fan-inspired platformer promises endless fun for rhythm-
based game lovers. Welcome to Geometry World, has just been updated with a completely new story. This game features two worlds with five levels each, new dungeons, new music, updated adversaries, and new versions of everything else as well! Do you want the ultimate intense gaming challenge? Do you consider yourself to be a die-hard gamer?
Prepare to be immersed in one of the most difficult rhythm game-platformer hybrids from the comfort of your PC. Explore some of the most difficult levels loaded with obstacles, traps, and other devices meant to put your platforming abilities to the test. Having said that, Geometry World, despite the term "geometry" in its title, is a skill-based game
rather than a math-based one. About Geometry WorldGeometry World is a follow-up to the critically acclaimed Geometry Lite rhythm game, it only has 10 levels separated into two worlds. What it lacks in levels, it makes up for in features, with new icons, a store, a
new vault, daily missions, levels and prizes, and hidden boxes. This is one of the simplest game just has one button for control. In terms of gameplay, your goal is to avoid colliding with any of the obstacles in each level. This game is similar to an infinite
horizontal runner in 2D; anybody who understands how to push a button can play it. The primary goal of the project is to show off the new features of Geometry Lite, commonly known as version 2.1. This explains why the game has just 10 stages. Still, the 10 levels you can play are some of the hardest platform levels I've ever seen in a free
app. Explore Daily QuestsGeometry World, like any other free-to-play game, does not enable users to participate in daily tasks. This activity is for everyone to get more prizes that they may need for the future stages. Achievements are also included in the game as part of this mission. All of these accomplishments may be found on the main menu. Take
note that there are over 200 achievements available while playing Geometry World. So, nothing can stop you from completing the daily objectives and hunting for additional goodies as you can! Plenty of ChallengesIt may take some time initially to
complete a level in Geometry World. However, after you've mastered the game's mechanics, you'll breeze through each step with ease. Don't worry, there will be plenty of difficulties throughout the game for you to face. Furthermore, there are many settings in which you can practice and execute your talents. Still, if you start playing the game on your
PC right now, you'll learn all there is to know about it. Good luck in a new sort of adventure universe! Geometry Dash World Game's popularity has surged, making it one of the most popular rhythm games of all time. Today, you can get it for free on PC by visiting this link. All you have
to do is follow the basic directions and play as much as you like. So, what are you still waiting for?To download this unique arcade game to your PC, click the "Play for Free" icon on your screen. Share it with your friends and family for an even more enjoyable and difficult gaming experience. Game Features Action-Platforming with Rhythm! Earn prizes
by completing daily missions!Play levels produced by the Geometry Lite community online!Unlock new icons and colors to personalize your character!Fly rockets, change gravity, and much, much more!Use practice mode to hone your abilities!Experiment with the near-impossible! Note: This is ONLY to be used to report spam, advertising, and
problematic (harassment, fighting, or rude) posts. Geometry Dash > General Discussions > Topic Details Only 60fps on 144hz monitor? Hello GD community, I have a 144hz monitor? Hello GD community, I have a 144hz monitor? Hello GD community, I have a 144hz monitor? Hello GD community, I have been using V-sync on. I turned it off to try to get better results, but it drops to 60 fps. Is there a way to fix this with V-sync off? I know my very little about my
specs, but I have a NVIDIA 970 gpu. Thanks! Note: This is ONLY to be used to report spam, advertising, and problematic (harassment, fighting, or rude) posts. Minimum:OS *: Windows XPProcessor: 2.0 + GHzMemory: 512 MB RAMGraphics: OpenGL 2.0 supportStorage: 100 MB available space * Starting January 1st, 2024, the Steam Client will only
support Windows 10 and later versions. Minimum:OS: Mac OS X 10.7Processor: 2.0+ GHzMemory: 512 MB RAMGraphics: OpenGL 2.0 supportStorage: 100 MB available space Page 2 [FIXED] game is stuttering/lagging with a high end pc, help My pc has: 8GB RAM NVIDIA GeForce RTX 3070, AMD Ryzen 5 5600 6-Core Processor, 64 Bit Windows 10
and Two 1TB Hard Drives.GD Settings: Fullscreen, Texture quality high, Vsync on, Smooth fix off, I've tried messing with the settings in and out of window mode and changing the Texture Quality. I have also changed settings in the NVIDIA Control Panel like the FPS Cap and
Vsync, but nothing has worked and it still stutters and lags. I do have the latest Drivers and Windows update and I've tried re-installing the game multiple times but once again, nothings happened. Any help would be greatly appreciated because this game is near impossible to play like this. edit: another thing to note is that this just kinda started
happening out of seemingly nowhere, and i dont remember changing anything at all. Vibe the rhythm, defy the odds in Geometry Lite! Inspired by
the iconic games Geometry Dash and The Impossible Game, this fan-made masterpiece delivers the rhythm-based platformer game genre's signature challenge with a fresh twist. Experience everything you loved about Geometry Dash: the infectious music, vibrant visuals, and notoriously tough gameplay (yes, it gets frustrating, but in the best way!).
But Geometry Lite goes further, adding exciting updates that will keep both veterans and newcomers hooked. The true reward lies in conquering each level after countless attempts. The feeling of triumph after reaching the finish line is pure adrenaline-fueled bliss! New FeaturesIn Geometry Lite, new updates add fresh twists while retaining the
addictive, "gotta beat it!" gameplay of Geometry Dash. Prepare for epic challenges ranging from tough to nigh impossible as you guide your geometric cube through a gauntlet of obstacles. An array of captivating features are added that will keep players engrossed and unwilling to stop playing: The intuitive one-click controls allow players to dive right
in and quickly get the hang of maneuvering through the game's dynamic levels. Epic soundtrack pulses drive players onward through each melody's rising action. The timing-based gameplay becomes part of the beat itself. Available Levels Stereo Dash (Easy, 2) Gravitational (Normal, 3) Drought (Normal, 4) Step After Step (Hard, 5)
)Never Give Up (Hard, 6) Step Jump (Harder, 7) Teleporter (Harder, 8) Cyclestep (Harder, 9) xAdventures (Insane, 10) Popular Strategies and Gameplays Challenge your reflexes and rhythm in a gauntlet of levels! Navigate your character through obstacles like spikes and walls, mastering each unique level as it increases in difficulty. Every collision
resets the level, so be prepared to refine your jumps and dashes. But don't worry; catchy music and vibrant animations will keep you motivated as you unlock new character forms with special abilities, adding fresh twists to the gameplay. What's more, grasp the music's rhythm in each levelit's your key to perfectly timed jumps! There are two game
modes for each level:Normal: In this mode, your character must make it to the end of the level without hitting anything. This mode is all about precision and timing. One wrong move, and you'll have to start all over again. Practice: This mode is designed to help players improve their skills. In this mode, checkpoints are regularly placed throughout the
level. Whenever you collide with something, you will restart from the nearest checkpoint. Unfortunately, the catchy song for each level does not play in this mode. Practice mode is a great way to learn all levels' maps and improve your chances of success in Normal mode. Accompanying the great music are colorful animation effects, which also change
to the beat. As you progress, more character shapes will appear, each with its own unique function and controls, keeping the gameplay fresh! Experience gameplay that evolves as you do, unlocking a fresh wave of challenges with every form of transformation: Cube: The OG form, jumping with a click or tap. Holding the mouse or button will make the
gameplay); otherwise, it will descend very quickly. Wave: Your character can move up and down in a zigzag pattern. Hold the mouse or button to fly up diagonally and release to descend. Robot: Unleash jumps of varying heights with a button hold. Spider: The character can teleport to the nearest ceiling and change gravity instantly each time you press
the button. How to Controls The player controls the block's movement via input in the form of a press or hold, with the ultimate goal is to successfully navigate through each level and reach the endpoint. However, any collision with obstacles will result in restarting the level from the beginning. The game's music plays a crucial role, as timing and
rhythm are closely intertwined with the gameplay experience. SPACE/UP Arrow = JumpHOLD DOWN SPACE/UP Arrow = Multi-jumpUP Arrow = Steer vehicle downDon't touch the spikes, or you will have to restart! Difficulty, Tips, and Tricks for Every DasherSimilar to Geometry Dash, levels in Geometry Lite are also
ranked by increasing difficulty. These levels can vary in complexity and quality, leading to the assignment of different ratings. These ratings fall into three categories: star, feature, and epic, depending on the levels overall appeal and design. Easy levels are those that end with a 2 stars reward. Other than auto levels, these are the easiest levels to
finish and have the lowest degree of difficulty. Normal levels are those that reward 8 or 9 stars when completed. They are the most challenging levels in the game, and finishing
listed below, although they are a little more difficult than an Easy Demon. Hard Demon: This level of difficulty is for the mid-tier demon. To successfully complete Hard Demon levels aren't as harsh as Extreme Demons, but they
nevertheless provide many challenges to the player. Extreme Demon: This is the most difficult of the five subgroups. These levels are very difficult to finish since they need a lot of expertise, skill, endurance, and effort. Tips and TricksTurn down the rhythm, crank up the focus: Love the game's soundtrack? Sometimes, those thumping beats might lead
to misplaced taps - jumping on-beat when you need an off-beat move. Consider muting the music for tricky sections and how much easier it is to anticipate jumps when you're not tapping to the beat. Practice makes progress: Later levels throw a gauntlet of obstacles. Feeling overwhelmed? Practice Mode is your friend! Start at checkpoints, experiment
with routes, and get familiar with the level's flow. Remember, practice doesn't guarantee a flawless run, but it prepares you for the real challenge in Normal Mode. Golden rule: finish first, collect coins later: Those tempting yellow coins might beckon, but resist the urge! Focus on finishing the level first. This way, you'll know what obstacles lurk ahead
and can plan your coin-grabbing strategy. So there you have it, fellow rhythm warriors! With these tips in your arsenal, you'll be navigating Geometry Lite's treacherous paths like a pro. Remember, practice and patience are your keys to victory. Now go forth, conquer the levels, and let your skills sing! This article needs more sources for reliability

some Windows configurations keep certain parts ready for a faster startup, instead of fully refreshing them. Its important to give your PC a complete restart every now and then. This helps ensure that services and drivers can function and update correctly. Verify Integrity of Game Files Verifying the integrity of game files for Geometry Dash should be
done regularly, especially if developer RobTop Games releases a new update. But why you should frequently perform the verification of the integrity of the game files? This is a regular thing that usually happens on its own after you get a game from Steam, and you dont really notice it unless youre really paying attention. Sometimes this automatic
process doesn't work as it should, and thats when you start seeing issues when you try to play the game. The reason behind this is that games often come in big files that need to be unpacked. Whenever you copy, or in this situation, download something, theres a chance that things might not go as planned. The bigger the file sizes of a game, the more
 likely it is that something will go wrong during the download and mess up the game. This happens especially when there are updates, which are meant to replace the current files. Usually, when you get a patch for Geometry Dash, Steam will automatically look at the files and try to download them again. But, similar to how your computers services can
sometimes freeze, Steams services might also get stuck. If the automatic thing doesnt work, youll have to start this checking process on your own. To do that, you can right-click on the game in your Steam Library and then choose Properties. Head over to the Local Files section and choose the option that says Verify integrity of game files. Repair Steam
LibrarySometimes it can be a bit trickier than just making sure the games files are okay. Lets say your storage thingies are built so that their parts can get a bit old and worn out, but they dont totally give up and
become useless. Think of it like a notebook you use in school. Youve got lots of pages, and if you mess up, you can just erase and start over. But even the sturdiest page gets weaker with time. So, if youve got one bad page in your notebook, its no sweat. You just move on to the next one, just like how Windows switches to another good spot on your
storage thingy. What we can do to make sure that Geometry Dash dont end up on those wonky parts of your storage thingy and fix things up while were at it is to give your Steam Library Folder(s) a nudge to repair themselves. This makes Steam check if your games can be read properly as they should in your collection, and it sorts out any messed-up
data that the basic game file check wouldnt catch. Launch Steam Library Folder settings option from the main menu. Next, go to the Downloads section and select Steam Library Folder choice. Use Revo Uninstaller to ReinstallWhen people try to fix
issues by removing and then installing a game again, they often miss some hidden files. The problem is that the regular uninstalled. So, if you skip these files when you uninstall Geometry Dash, and it turns out that a bad
setting was causing your problems from the start, the problem will stick around no matter how many times you uninstaller to delete all files related to Geometry Dash. The image screenshot above is just the example interface of how the Revo Uninstaller works perfectly. This tool
will scan your PC for any residual files that are created by Geometry Dash. If youre interested to use this program, you can download it from this link. Cleanup Windows RegistryWe highly recommend using the free version of CCleaner. Many people who use computers can really gain from tidying up their registry and effectively handling apps that
start automatically and run in the background. You might find the outcomes quite astonishing! A convenient free version of CCleaner (portable) that does not require installation can be found here. Get the Latest GPU and Other Driver UpdatesThe components inside your computer are like its core, but if you dont keep them up to date, youll definitely
run into problems when playing Geometry Dash. Its a certainty that you wont be able to enjoy Geometry Dash if you dont update the necessary drivers on your PC. Some of the key drivers manually can be a bit tricky, especially if
youre not familiar with the process. To simplify things a bit, we suggest using Driver Booster. With this program, you can update everything with just one click. All you have to do is click the Scan and Update button, and then wait for the updates to finish. If you know your stuff and can handle it, its actually better to manually get the right drivers for
your PC. For your graphics card (GPU), just go to the website of the company that made your GPU and find the newest driver. You can also update other important drivers for your computer by going to the manufacturers website. Prepare Your Graphics CardModern graphics card (GPU), just go to the website of the companion apps that offer
simple instructions to assist you in maximizing your GPUs performance for gaming. However, there are two situations that the software cant manage on its own: In case your computer has multiple graphics controllers. If youve overclocked your graphics controllers. If youve overclocked your graphics cand. By the first scenario, I mean that many up-to-date motherboards, particularly laptops, have a
built-in GPU that shares memory with the main system and video rendering. These coexist with a separate graphics card that lets your computer or laptop switch between integrated and dedicated graphics. This might seem confusing when youd expect a single GPU to handle everything. But its an effective way to save resources, especially in terms of
power usage and heat generation. In an ideal situation, when your computer is handling basic tasks that dont demand heavy graphics rendering, it will utilize the integrated GPU. Then, itll switch to the dedicated graphics cards GPU, which requires more power and generates more heat, when youre doing something like playing a game. However, as
promising as this approach is, its not without its downsides. The main issue arises if an application mistakenly uses the integrated GPU when it should be using the application is idle. This can lead to noticeable drops in frames
per second (FPS) and unexpected crashes since the integrated GPU is significantly less powerful due to its lack of dedicated resources. To prevent your computer from using the integrated GPU in such cases, you can instruct it to solely use the performance mode when youre gaming. This will disable power-saving features that would typically switched
the GPU to save battery life. You have the option to configure this either for a specific game or apply it as a general setting for your GPU usage. The pictures provided display the choices through the appearance might vary for AMD switchable Graphics GPU, follow these through the appearance might vary for AMD switchable Graphics GPU, follow these through the appearance might vary for AMD software. If your system utilizes a dual AMD switchable Graphics GPU, follow these through the appearance might vary for AMD software.
instructions:Launch AMD Catalyst Control Center.Navigate to Switchable Graphics.Choose the High-Performance section and pick the game (if not listed, manually add it by clicking Browse). Click Apply. Furthermore, its advisable to verify your PCs power settings. If youre using a laptop, make sure the charger is connected. Access Control
Panel. Select Power Options. Click on Change Plan Settings. Opt for Change advanced power settings. From the drop-down menu, select High Performance and confirm with Apply. Subsequently, we move on to setting a cap for frames per second (FPS). This is done to address potential issues related to overclocking. To accomplish this, adjust the specific
graphics settings for Geometry Dash. Once again, the provided images depict the process using Nvidia Control Panel and proceed with Add program in the Manage 3D Settings section. Select the exe file of Geometry Dash from the list to add. You have the option to adjust the frame
rate limit. I suggest beginning with 60 FPS and raising it later once youre confident that your graphics card can manage the workload effectively. Just remember, were using a different game as an example in this case. However, the steps involved are the same, so theres no need for any confusion. Use MSI AfterburnerIn order to avoid sudden
increases in temperature due to abrupt boosts in performance, using a fan curve that responds faster can be beneficial. This is the response pattern I personally use for my system. The outcomes can differ based on your cables to
not disrupt internal airflow), and any additional cooling equipment you have. How does this make a difference? Whenever your computer shuts down, either completely or partially, its because protective measures kick in to prevent potential hardware damage. This usually happens when certain components get too hot and cross a specific temperature
limit. This is a widespread issue, and its not solely caused by the game itself, as many factors contribute to it. In simpler terms, during specific rendering processes, only a portion of what you see gets rendered, and the cooling system of your graphics card adjusts automatically. Nonetheless, there are situations where, for instance, the demand on your
graphics card suddenly spikes when transitioning between scenes. This can overwhelm graphics cards with weaker cooling systems, making it hard for them to handle the sudden cooling requirements. To tackle this problem, adjusting how your fans respond can offer a quick and simple solution. You can download MSI Afterburner for free from this
 link.This tool is also useful to check if any of your hardware components are overclocked and to what extent. Reducing the output of overclocked parts to around 90% to 85%, rather than pushing them beyond 100%, can enhance the games stability. This adjustment involves a small sacrifice in performance thats not very significant. Use Borderless
GamingIf youve got a specific setup for your personal computer, you might find Borderless Gaming to be really useful. Its a free tool that can do some extra things to help your games work better on your computer. To get the tool, you can go to this website. This tool doesn't contain to support the person who made a specific setup for your games work better on your games work bett
it, theres also a version you can get on Steam. People have found that Borderless Gaming works really well, especially if youre playing Geometry Dash and want it to look like its fullscreen but still works like a window, you can
use this extra tool. Its even better if youre using Windows 11. Increase Shader Cache on your graphics card. This can be particularly helpful for computers with lower capabilities! Increase Virtual MemoryIncreasing your computers
virtual memory will also enhance the stability of Geometry Dash. Step 1: Go to the Windows Settings and select the System section, click the Advanced system section, click the Advanced on the right side of the screen. Step 3: A new window will open showing you more options. Click Performance Options then click the
Advanced tab. Under the Virtual memory section, click the Change button to modify the allocated virtual memory. In the example screenshot provided, its clear that the amount of memory or higher, though the specific amount should be based on your hardware
capabilities. Make sure your device has sufficient memory before making any changes. Disable Steam Cloud Services Unless you absolutely require it for the game, like for syncing your game progress with your Steam Deck, or if you simply want occasional backups, my suggestion is to turn off the Steam Cloud Service for the game. This is because its a
major cause of problems with game saves. To do this, just right-click on the game in your Library, go to Properties, and disable the Steam Cloud for that specific game. Disable Microsoft Edge is a lost cause, since its features are tightly woven into the heart of the operating system. However, if
you go for another browser instead of Microsoft Edge, its a good idea to turn off its Startup Boost feature. This way, you can release system resources that would otherwise be given to the app without actually being used. Contact the Official Geometry Dash SupportIf everything else doesnt work, our suggestion is to get in touch with the official
support team of Geometry Dash directly. There are various methods to do this, but we suggest attempting to contact them through Geometry Dashs official community page on Steam. Developers who are active usually respond to reports posted in the community page on Steam.
problem. If you havent received a response from the developer via the community page, then try reaching out to them through their official website. on the Simple English Wikipedia. All of the pages are free to use. They have all been published under both the Creative Commons Attribution/Share-Alike License 4.0 International License and the GNU Free Documentation License. You can help here! You may change these pages and make new pages. Read the help pages and other good pages to
learn how to write pages here. If you need help, you may ask questions at Simple talk. When writing articles here: Use Basic English words and shorter sentences. This allows people to understand complex terms or phrases. Write good pages. The best encyclopedia pages have useful, well-written information. Use the pages to learn and teach. These
pages can help people learn English. You can also use them to make a new Wikipedia to help other people. Simple does not mean short. Writing in Simple English means that simple words are used. It does not mean readers want basic information. Articles do not have to be short to be simple; expand articles, add details, but use basic vocabulary. Be
bold! Your article does not have to be perfect, because other editors will fix it and make it better. And most importantly, do not be afraid to start and make articles better yourself. Jeff Tesreau wearing the baseball uniform of the New York Giants around 191218A baseball uniform is a kind of clothing that baseball players wear. They do this to show
 which of the two baseball teams they play for. Most baseball uniforms have the names and uniform numbers of players who wear them on the uniforms to tell different baseball players from each other. Baseball shirts, pants, shoes, socks, caps, and gloves are parts of baseball uniforms. Most uniforms
have different logos and colors to tell which team is which. Baseball uniforms were first worn by the New York Knickerbockers Baseball Club in the 1800s. Their uniforms were pants made of blue wool, white flannel shirts and straw hats. Since then, the uniforms were pants made of blue wool, white flannel shirts and straw hats.
done and added to baseball uniforms over the years. The style of baseball uniforms also changed, little by little over time. more... Other very good articles: Doughnuts (pictured) per person than any other nation?... that comic book writer Stan Lee was
that in 1925, a team of sled dogs delivered drugs against a disease outbreak to Nome, Alaska, which was cut off because of bad weather?... that playback singer Asha Bhosle is one of the oldest actresses to make their debut in Bollywood, at the age of 79?
