mp3Direct Cut is a fast and extended audio editor for MP3 encoded and AAC. Without re-coding directly cut, crop, split and merge tracks, create fades on MP3 and more. Leakless direct editing saves encoding time and preserves the audio quality of the encoded tracks. The built-in recorder creates MP3 on the flv. With Cue Sheets, Pause Detection or Auto Cue you can easily split long files. Direct Data Copy, Non-Destructive Cutting, Copy, Paste Level Change, Fade, Normalize on MP3 MP4 and M4A support to AAC from ffmpeg connected. exe Batch processing · Cue Sheet support Multi file opening for dialog, drop, or M3U detection Pauses · Auto cue for time values Trace the division with filename and tag creation Trim · Crop · Quick game · Loop play ID3v1.1 tag editor, ID3v2 tag keeping Level meter · Bitrate display Registration level enabled Command line use Version 2.34 · 2021-09-30 · 311 KB · Simple installer (sfx zip) A. Some more improvements 2.32 Fixed glitch tooltip A. Fixed overdri removed A. Assignment of the control system of the control syst system of the control necessary, press Prelisten AS CUT (or F9) and adjust the selection with the keys 1-4. Cut with thebutton (or Del key). How to fade out). In the Edit menu, select Simple fading or Two-stage fading. Adjust the fade with the gray handles: left button up/down for the layer, right button left/right for the position. Add stitches (selection of zero length) for more complex curves. Gain adjustment is only possible for MP3, not for AAC and MP2. How can I merge or add audio tracks? Drag a single file or a group of files into the program. The Explorer lists the file under the pointer first. Files dropped in the open audio graph will be added. You can also open multiple files in the Open dialog. The compiled track will be created with Save All Audio.... Important: The audio parameters (format type, sample rate, stereo mode, CRC) must match. What do I need to play/edit AAC and MP4 audio? To play AAC files (which are also the audio tracks of MP4 in most cases) mp3DirectCut needs the free "libfaad2.dll" in its folder. See the Other page for download links. MP4 audio must be demultiplexed to AAC. This can be done automatically with the free "ffmpeg.exe" and its added location in the mp3DirectCut decoder settings. The AAC will not be multiplexed to MP4 again. Install malware problems or alarm. The installer is a self-extracting ZIP file. Simply copy the files to the selected folder and create a desktop icon. To copy files to the default folder "Program Files", you usually need to run the installer "As Administrator" (right button). No administrator rights are required if you install the program in a folder to which you have write access. Distribution files can also be extracted with an archive utility (e.g. 7-Zip). Malware alerts? Please consult the Contact page. The audio chart looks pretty weird. The mp3DirectCut navigation chart shows fast MP3/AAC data instead of decoded PCM. In many cases it contains only higher frequencies. It can also be too high or too low, in these cases you can adjust the height in the Options menu. (or Numpad +/-). In rare cases the display does not show anything. In some cases silences may appear with a high level. The actual audio level is always shown during playback with the level meter on the right.
