Instagram: Facebook: Twitter: https: //twitter.com/tandemHQVK: Service terms: https: //www.tandem.net/termsofserviceLoichenses: Tandem - Linguistic exchange is licensed by Tandem Fundazaa (http: // Tandemcity.info) Aug 31, 2021 Version 4.0.2 Tandem group chats arrived! In this latest version, tandem members can invite their friends to a group chat and start learning together. We love the improvement of our knowledge of other languages by talking to the mother tongue. But it's not always easy to find flowing friends in German, Korean or Icelandic. The global tandem community connects the pre-shielded students and tutors through the chatter of text and video, and covers almost all speaking languages and writings "including Klingon, Dothraki and Emoji. ?????? This is a Thus great concept for language students with a limited budget. There is no need for classes or a tutor when you can talk to someone as eager to learn like you. I love how we can teach us each other our languages Native so casual. I give this app 6/5 stars if I could! Update: I had tandem for a week and I have already seen evident improvements in my Spanish conversions! I particularly adore the function of voice text. It allows me to practice My pronunciation without having the video chat, which can sometimes be difficult and embarrassing when you didn't talk to someone long enough. There is a slight problem that I had with some conversations every now and then. Sometimes I will send a message or Two, but only reach the blue outline circle and controllers only to view that they were sent but not delivered. It is usually eventually delivered after waiting a little or send a couple of more. I wonder if there is a solution for this, or if it's just a problem with the wifi connection. I love this app and I still appreciate the time that developers required to respond to my evaluation. It's not exactly a substitute for my deleted exchange trip, but approaches what I expected. This made the quarantine much more pleasant! Thanks devs !! Court! Thank you for your great review! It makes us super happy to listen to you are loving our app! Good luck with your language learning, Tandem team :) I really want to leave more than three stars because this app is so fantastic in theory. The problem is that a lot of time your messages are accessible because you need to scroll up and then down and then up and then down and repeat about four or five times to charge your messages . When I downloaded the app that I had obtained over 200 messages on the first day and made it really difficult to talk to people and understand who would be a good teacher and a mentor and that I could help the same way because with so Many messages enter and not be able to upload more than the first 10-15 messages made extremely difficult. At this time I have my free 30-day trial for Pro and so far the Pro options are really fantastic. I would give this five-star app in a heartbeat if and only if we could get a little more fluid interface and a better flow while trying to upload messages. This app thus has so many potentials and you can really learn a lot there are many people are very useful To download this app and try to get to know people and talk to your languages that you are interested because it's still a very precious app. I really had problems with spammer or robot or advertising or something that is fantastic! Hey, thank you for giving us a review and we are pleased that you like our app! App! I love being able to help improve your experience so felt free to contact us at support@tandem.net and a member of our team will be happy to help! :) The developer, tripod technology, indicated that app's privacy practices may include data management as described below.
