Want to talk directly with the Squardle Squad? Join our Discord and subreddit! Crafting the Puzzle Let's spell out a special thank-you message with this grid. A 5x5 grid gives us 25 characters to work with, so a first attempt is: THANK YOU FOR ALL THE SQUARES Add an exclamation mark at the end to get to 25 characters — a bit unusual, but it'll just fade out to show that it's not used as a "letter." I love the 8-letter word in this puzzle that starts with "TH". It's quite appropriate. But we quickly spot two issues: No words use the "QU" in the corner. There's a mildly disparaging word in there (finding which is left as an exercise to the reader). After tinkering with it a bit, we find a variation that lets us celebrate another amazing aspect of the Squardle community: THANK YOU FOR ALL THE FEEDBACK Categorizing the Words Now we need to plug this grid into our solver, which cross-references the Squardle word list. It starts with a basic word frequency list to tentatively split words into Required and Bonus lists. (The cut-off point for word frequency is an arbitrary choice, so we still need to examine each word individually and decide whether it's common or obscure.) The Squardle Squad is pretty well-read. But our own experiences are subjective. We check several dictionaries, plus Wiktionary, Wikipedia, Google Search results, and more, to estimate how obscure a word is. Our friends, families, and Discord members are also handy resources for informal polls. We also release some puzzles to beta players for early testing. That helps us see what words people may struggle with and what words are more common than we thought. Lately we've been moving hard-to-categorize words into the bonus word category — it's more frustrating to have to brute-force a word you don't know, than it is to enter a word and have it not contribute to your main score. Here are some words in this puzzle that the word frequency list suggests should be required, but that we'll give some subjective consideration. (SPOILER ALERT: a few of these words remain as required words.) keeler I've never heard this word. The definitions are mostly marked as "dialectal." It may be more common in England, but for a word game based on American English, it's a bonus word. teflon The genericized form of "Teflon." I think most people have heard of Teflon, but it usually refers to the trademarked, capital-T brand name. aloha "Hello/goodbye" in Hawaiian. It's made its way into English, but it still feels like a non-English word. The clincher for me is that "hola" (Spanish for "hello") is not in the official Squardle word lists, so it would be weird to require "hello" words from other languages. celeb A shortening of "celebrity." Shortenings are hard to categorize, but I think this is informal enough to qualify as a bonus word. Phew. After categorizing these words, we turn to the 225 words marked as "bonus." Most of these are words I've never heard of, and about half aren't even defined in Merriam-Webster — but they're still valid English words according to our source word lists. 14 of these words are common words that really should be required, so we move them to the "required" list. The most controversial bonus word will probably be "halfback." If you follow informal. Bonus word. flora Hah, both "flora" and "fauna" in the same puzzle? Definitely keeping both of these as required words, because that's just hilarious! hoary This word is a bit archaic or poetic. Folks might know "hoarfrost", but "hoary" isn't a word we see very often. knoll If not for the infamous "grassy knoll", this might've been a bonus word. lohan An example of the word frequency list breaking down. Lindsay Lohan is a famous actress, but the lowercase-L "lohan", in East Asia, refers to any of the historical enlightened Buddhists. Definitely a bonus word. torah Some people will be irked by this, but: "Torah" is normally capitalized. The lowercase "torah" refers to the general body of Jewish religious literature and is a more obscure usage. alfa The proper noun "Alfa" refers to "A" in the radio alphabet. The lowercase "alfa" actually means a West African Islamic cleric — certainly a bonus word in American English. faro A gambling game I've never heard of. According to Wikipedia, it hasn't been popular in the US since the early 1900s, so we'll make it a bonus word. hale A tricky word to categorize. It's a perfectly valid word, meaning "healthy", but I suspect a lot of people don't know this one and we only really see it in poetry, older literature, and crossword puzzles. So let's make it a bonus word. kell I'm not familiar with any of the definitions of this word. Merriam-Webster doesn't define it at all (except as a proper adjective). Bonus. noll Apparently a dialectal word in the UK for the [top of the] head. Not at all common in America. rhea A South American bird I doubt many people have heard of. roan A coloration, especially common in describing horses. Another word that's tricky to categorize. In the past, we've marked it as required, but we're trying to make these puzzles more accessible. We'll probably take some flak for this, but: bonus word. yale My alma mater and a common crossword puzzle word! But lowercase-Y "yale" (a mythical beast) definitely belongs as a bonus word. Phew. After categorizing these words, we turn to the 225 words marked as "bonus." Most of these are words I've never heard of, and about half aren't even defined in Merriam-Webster — but they're still valid English words according to our source word lists. 14 of these words are common words that really should be required, so we move them to the "required" list. The most controversial bonus word will probably be "halfback." If you follow American football or rugby you'll know this word, but it's not in the common lexicon the way "quarterback" is. Since its usage is really limited to a specific field (sports) — even if the field is fairly commonly known — we'll make it a bonus word to avoid penalizing folks who have little interest in sports. Then there are bonus words that you probably understand as soon as you read them — "refeel, holed" — but wouldn't normally think of on your own. English is great at making new words from prefixes and suffixes. But these technically valid words don't really come up often. So now we've categorized 109 required words and 209 bonus words. There are usually twice as many bonus words as required words, so this looks about right! Next, we need to rate the difficulty — it's easily a 5, with this many words and with some of the words being more complex. Lastly, let's add a special message and select the Bonus Word of the Day. The Bonus Word of the Day has been a fun part of Squardle since its inception in late February. It's just a way to share our love of words with our players. And sometimes we can point out a word that folks might think should be required, and explain why it's a bonus word. (Example for an upcoming puzzle: "brie." Did you know Brie, the cheese, is a proper noun, and therefore not a Squardle word? But the lowercase-B "brie" refers to "broth" in Scottish English. That's definitely obscure!) This Bonus Word of the Day is a fun one, and perhaps the longest one we've had so far. I hope you like it! (Hint: It's made up of the 8-letter word that starts with "TH", plus a three-letter suffix.) Time to save the puzzle and let our Beta players in the Discord know it's ready. Once we incorporate their feedback, we're releasing it publicly. Happy Squardleing! The aim of the game is to form words by connecting adjacent letters horizontally, vertically, or diagonally. Squardle uses the daily challenge format, like Wordle from which it takes its name, with one grid per day as the daily challenge here Specify the grid letters in the boxes and click the word search button. Squardle Solver is a tool designed to help players find valid words. Its use is a matter of personal preference, and some players may keep it an aid, while others prefer to play without it. Ultimately, its main purpose is to improve skills and help understand the game better, but its use for cheating depends on your choice as a user. Squardle eliminates obscure or rare terms which are called bonus words. The discovery of these bonus words does not improve the score but are counted. Bonus words include: archaic, obscure or domain-specific vocabulary, non-American English terms, slang expressions, etc. Typically, there are about twice as many bonus words as required words. This exclusion ensures that the grids remain accessible to a wide audience while recognizing the diversity of players' vocabulary. The list of bonus words is secret and not shared by the authors of the game, it is impossible to know for sure if a word is bonus or not. dCode offers all the words.
