Brambleton family practice

We offer comprehensive and personalized healthcare services to both children and adults, including routine check-ups, vaccinations, and treatment for various illnesses and conditions. As family medicine specialists, we take a holistic approach to patient care, focusing on the individual's overall well-being and addressing their physical, emotional, and social needs. Our pediatric services cover essential care from infancy through childhood, including monitoring growth and development, addressing developmental issues, and ensuring timely vaccinations. We also provide adolescent health services, helping teens navigate this critical transition period with education, support, and resources to promote healthy behaviors and choices that impact future well-being. Some key areas of focus for our patients include general physical health and nutrition, mental health and substance abuse, sleep disorders, sexual health, violence prevention, and dermatologic concerns. Our skilled providers are committed to delivering exceptional care and addressing unique needs for each individual patient. Women's health services at Inova include menstrual disorder management, contraception guidance, menopause support, and breast care. We offer a range of diagnostic tests such as mammograms, pap smears, colonoscopies, and endometrial biopsies to detect various cancers like breast, cervical, uterine, and ovarian cancer. Our comprehensive women's healthcare services also cover GYN check-ups, management of related health issues, IUD insertions, and screenings for various conditions. As a leading nonprofit healthcare provider in Northern Virginia and the Washington, D.C. metropolitan area, Inova provides medical and preventive care to patients of all ages. We encourage healthy lifestyles, health maintenance, and partner with our patients to help them stay well. With over 25,000 team members, we deliver high-quality care through our expansive network of hospitals, primary and specialty care practices, emergency and urgent care centers, and outpatient services. Inova serves more than 1 million unique patients annually, with over 4 million patient visits each year. We are consistently ranked as a national healthcare leader in safety, quality, and patient experience. In 2025, we were recognized as the Health System of the Year by Press Ganey for our excellence in patient care, team member engagement, and commitment to continuous improvement. Inova is home to Northern Virginia's only Level 1 Trauma Center and Level 4 Neonatal Intensive Care Unit, providing high-quality healthcare to every community we serve. Our state-of-the-art facilities include multiple locations throughout Virginia: Falls Church, Alexandria, Fairfax, Leesburg, and more. Visit our website at www.inova.org for more information. Given article text here Looking forward to seeing everyone at the meeting tomorrow and discussing our strategies. We are honored to be named on Becker's Healthcare's 150+ Top Places to Work in Healthcare list for 2025, reflecting our commitment to supporting our team members with comprehensive benefits, growth opportunities, and an inclusive work environment. At Inova, we know that our people are the reason we're a national leader in healthcare safety, quality, and patient experience. Today, for Nurses Week, we're proud to spotlight Glory V., MSN, RN, CNOR/ OR Service Line Leader, Ophthalmology and Vascular Surgical Services at Inova Fair Oaks Hospital, for her expert care and leadership. Last year, she traveled with the VHC Medical Brigade team to Comayagua, Honduras, where she helped provide free cataract surgeries to the underserved members of the community. We're honored to recognize the nearly 1,000 attendees of the 25th Lobster Extravaganza event, which raised more than \$1.2 million to support Inova Peterson Life with Cancer! This incredible program provides strength, hope, and vital resources to individuals diagnosed with cancer—and their loved ones. Today, for Nurses Week, we're proud to spotlight Johanna E., BSN, RN, CPEN, CEN, TCRN, a Registered Nurse at Inova Children's Emergency Room at Inova Loudoun Hospital. Inspired by the strength and resilience of the children she cares for, Johanna pays it forward by speaking to students at the Loudoun County Public Schools Health & Medical Programs Academy at Briar Wood High School supports young minds to explore meaningful careers in healthcare. Johanna shares her nursing journey. MyChart Information: With MyChart, you can: * Request medical appointments with your primary care provider * Use eCheck-in to check-in before visits * View health summaries and test results * Request prescription renewals * Access trusted health information resources * Communicate securely with your care team (e-visit) Requirements for MyChart: * Must be at least 14 years old to sign up * Teen patients need permission from parents/guardians before accessing their own accounts * Parents/Guardians can request full proxy access for children under 14 or limited access for children aged 14-17 To access your MyChart account, head to the "Account Settings" section and review your settings. Additionally, ensure your browser settings aren't sending MyChart emails to junk mail or spam folders. Patients can sign up during visits or receive activation codes on visit summaries. This code enables login and creation of a unique user ID and password. You can access your account by logging in at www.inova.org/mychart. If you didn't receive an activation code, request one directly from the website or call your primary care clinic for assistance. Activation codes expire after 45 days and are no longer valid after first-time use. For login difficulties, contact the MyChart support line at 1-855-694-6682. Note that the activation code is not your MyChart ID or password; you'll only use it once to log in for the first time. After logging in, you'll be asked to create a unique MyChart ID and password. You can still sign up without an activation code. If needed, contact the MyChart support line at 1-855-694-6682, and after verifying your information, a new code will be sent. Choose a MyChart ID and password that's easy for you to remember but hard for others to guess. MyChart ID rules: * May consist of letters (a-z), numbers (0-9), or special characters (_ @ .) * Must be unique MyChart password rules: * Must be at least eight characters long * Combination of numbers, letters (uppercase and lowercase), and special characters (@ ! .) * Avoid using easily guessable passwords like names or phone numbers Remember that only you will know your MyChart ID and password. Customer Service won't have access to this information. If you forget your ID or password, click on the corresponding link on the sign-up page. To reset your username, enter your first name, last name, Social Security number's last four digits, and date of birth. Your ID will be emailed once the information is matched. To reset your password, enter your MyChart ID, date of birth, and email address. Then, answer the password reset question you created when signing up for MyChart. After answering, select a new password. Some clinics may not currently accept appointments via MyChart; if you're experiencing difficulty scheduling with multiple caregivers or for multiple You can check appointment details online, confirm or even complete eCheck-in. If there's no "Cancel Appointment" link next to an upcoming appointment, call the provider's office instead. They'll cancel it for you. Don't include personal health info with appointment requests or cancellations. You can schedule appointments for others if you have proxy access, just follow the same steps as scheduling for yourself. MyChart lets you eCheck-in before appointments, but make sure to do it at least 24 hours in advance. Completing eCheck-in saves time and speeds up your care experience. Some forms might still require in-person verification though. You can complete the eCheck-in process 24 hours ahead of a virtual visit too. Messages like appointment requests, lab test advice, or medication refills usually get answered within three business days. However, messages about new symptoms or medical conditions should be discussed during an in-person or virtual visit with a provider. Sometimes, providers might suggest scheduling a visit to ensure you receive the best care if they can't answer your questions online. e-visits offer a convenient way to communicate with healthcare providers, allowing for more thoughtful and clear responses while ensuring timely clinical guidance. Patients can use digital platforms like MyChart to ask quick clinical questions and receive standard charges for the visit. Coverage verification and self-payment options are also available. The provider's care team will contact patients if an in-person or virtual visit is necessary, and they will be notified of the status of their message. Patients' medical information is reviewed and updated during each visit, and changes can be requested through MyChart. To request medication list updates, patients can click on "Remove" to remove medications and then select "Add a Medication" to add new ones. The healthcare provider may release new test results, recommend follow-up appointments, or provide additional instructions, and patients should log in frequently to check for new information. You can expect a response within three business days via MyChart. However, it's recommended that you don't use this platform for urgent situations. Instead, call 911 or your doctor's office immediately if you're experiencing a medical emergency. To send a message to your provider, click on "Menu" and select "Messages" under Communication. Then, follow the prompts to compose and send a message. When sending messages, you can attach up to three files with specific types such as JPEG, JPG, PDF, PNG, TIF, or TIFF, with a maximum size of 6 MB for images and PDFs. It's also suggested to upload your insurance card in advance to speed up the check-in process. Please note that uploaded documents may be reviewed by your provider's office before being added to your MyChart account. Your primary care physician can override any recommended preventive care procedures if they don't apply to your specific situation. Additionally, you can request and view your complete medical records or just abstracts by contacting the Health Information Management department. For outpatient visits, you can also contact your Inova provider's office directly. Lastly, keep in mind that prescriptions written outside of Inova may not appear on your medication list unless they're documented by your Inova provider in their electronic medical record. Prescription renewals within 24 hours of receipt during business hours. If requested on weekends or holidays, it will be processed the following day. For urgent renewals, contact your provider's office. Your primary care physician documents all medications in your electronic medical record. If a medication was documented but not originally prescribed, you'll see "contact prescribing provider" on the medication page. Medications that have been documented but not prescribed by an Inova provider cannot be renewed through MyChart. To access these results, go to Menu > Test Results under My Record section and click anywhere within the row to display the test results. For hospital lab results, select yes under Include Hospital Results. Test results are released in MyChart as soon as they're ready. If you prefer your care team to review them first, navigate to Test Results and select Results Release Preferences in MyChart. You'll receive a notification when a test result is released. To receive daily summaries of new test results, go to Communication Preferences > Health Details > Test Results. The text portion of radiology reports can be viewed in MyChart, released at the discretion of the ordering physician. Radiographic images are not transmitted through MyChart. If you need a copy of your images performed at Inova, visit PowerShare and log in with proxy access. Forms are available in MyChart for submitting electronic requests and processing through Medical Records. To access these forms - Parents can click on "Menu" then "Family Access (Proxy)" under "Resources" to access the Child Proxy form. - Teens can click on "Menu" then "Teen Access (Proxy)" under "Resources" to access their Grant Proxy form. - Adult patients can click on "Menu" then "Share My Record" under "Sharing", and choose "Friends and Family Access" to request access to another Adult's account. To grant proxy access, each adult must sign and establish their own MyChart account. However, you can invite someone to see your record. Proxy access can be requested in two ways: - A form needs to be completed for each person requesting access. - For a child (0-13 years old), a proxy request is established electronically within the child's medical record. Some key notes on parental access for teen records include: - Teens will have full access to their medical record, including upcoming tests and procedures. - Parents and legal guardians with proxy access can schedule appointments, complete eCheck-in processes, and submit refill requests, but not for Obstetrics and Gynecology (OB/GYN) or Forensic Medicine providers. To establish proxy access for a legal guardian, you'll need to provide a court order granting access to the patient's medical record. Attach a copy of the document to the proxy access form and return it as instructed on the form. If you're caring for an individual with diminished capacity, you can set up MyChart proxy access from their provider's office. For parents or legal guardians requesting access to a child (0-13 years old) or adult patient, Teen Proxy requires permission from the parent or legal guardian first. Once granted, you can submit a proxy request. To access medical records via MyChart, use online forms available in the system and processed by Medical Records. Parents can access Child Proxy forms under "Resources" > "Family Access (Proxy)" and Teens can access Grant Proxy forms under the same menu option. Adult patients can request access to another adult's account under "Sharing" > "Friends and Family Access." MyChart allows anyone with an Inova provider to sign up, but users must be at least 14 years old. Users can deactivate designated proxy access holders by logging in, selecting "Sharing Hub," and revoking access. Inova prioritizes patient health information privacy and security through secure activation codes, personal IDs, and passwords. Each account holder controls their own password, and the account cannot be accessed without it. MyChart messaging occurs while users are logged on to the website, ensuring confidentiality. Inova limits employee access based on their role in care, using firewalls, passwords, encryption, and audit trails for added security. Secure Access Requirements for MyChart Our website requires a Secure Sockets Layer (SSL) compatible browser or terminal (Firefox, Chrome or Microsoft Edge) to ensure secure access to your medical information. To maintain access to your MyChart account, ensure a stable internet connection and an up-to-date browser like Firefox, Chrome, or Microsoft Edge. For optimal performance, these browsers are recommended. Apple Safari is no longer supported. The MyChart app is available on both iOS and Android devices. Log in with your existing credentials to utilize the mobile application. Periodically update the app for security reasons.
