For safe use 1 For safety and safety Camry U (OM33D37U) WARNING AA, front of the classification system of passenger occupants Precautions Observe the following precautions relating to the classification system of the front passenger occupants. Failure to respect could cause death or serious injury. A - wearing the safety belt correctly. A   - Make sure the front passenger seat belt plate has not been left inserted in the buckle before someone sits in the front passenger seat. A   - Make sure the "bag out" indicator light is not illuminated when using the safety belt extensor for the front passenger seat. If the spy of A   A, ~ A   A, ~ A "AAIR OFF" is illuminated, disconnect the language of the extension from the seat belt buckle and reconnect the safety belt. Reconnect the seat strap extender After ensuring that the "bag" indicator light is illuminated. If you use the seat strap extender while the "AA IR Bag OffA   A, ~ indicator light is illuminated, SRS airbags for the Front passenger may not activate correctly, which could cause death or serious injury in the event of a collision. A   - Do not apply a heavy load to the seat or the front passenger equipment (such as rear pocket). A, - Do not put weight on the front passenger seat by putting your hands or feet on the front passenger seat seat from the rear passenger seat. A, - Do not let a rear passenger raise the front passenger seat with their fee or press on the backrest with their legs. A, - Do not put objects under the front passenger seat. Page 52 of 568521-1. For safe use Camry U (OM33D37U) WARNING A, - Precautions of the Passenger Classification System Passenger Prosseurms Annant to recline the front passenger seat so far touching a back seat. This could cause illuminated the light of A   A, ~ A   A, ~ A   A, ~ ", which indicates that SRS airbags for the front passenger do not activate in the event of a serious accident. If the backrest touches the Rear seat, return the backrest in a position where it does not touch the rear seat. Keep the front passenger backback as much as possible when the vehicle moves. Reclining the backrest is excessively can reduce the effectiveness of the belt system Safety. A   - If an adult sits in the front passenger seat, A   A, ~ A   A, ~ A   A, ~ A   A, ~ A   A, ~ "The light of the indicator" It's illuminated. If the indicator of A   A, ~ A   A, ~ A   A, ~ A   A, ~ "is illuminated, ask the passenger to sit straight, far back in the seat, your feet on the floor And with the seat belt worn properly. If the indicator is A   A, ~ A   A, ~ A "air bag off" remains illuminated, ask the passenger to move to the back seat, or if it is not possible, move the front passenger seat completely to the Back A, - When it is inevitable to install a restraint system for children forward in the front passenger seat, install the retention system for children on the front seat of the PAS-SENGER in the correct order. (A, ~ A@P, 58) A   - Do not change or remove the front seats. A, - Do not kick the of the front passenger or subject to severe impact. Other, the SRS warning light could indicate a malfunction of the passenger's front emupant classification system. In this case, contact the Toyota retailer immediately. A, - The kidney retention systems installed on the rear seat must not contact the front seats. A, - Do not use a seat accessory, such as a pillow and a seat cover, which cancels the seat cushion surface. A   - Do not change or replace the upholstery of the front seat. 568531-1. For safe use 1 for and security Camry U (OM33D37U) A   - It is recommended that children sit in the rear seats to avoid accidental contact with the gear lever, the wiper switch, etc. A, - Use the back door child cleaner block or window lock switch to prevent children from opening the door while driving or operating the power supply window accidentally. A, - Do not let small children operate the equipment that can capture or pinch parts of the body, such as the powerful window, the cap, the trunk, the seats etc. Safety information for children observe the following precautions when children are in the vehicle. Use a kidnapping system for appropriate children for the child, until the child becomes great enough to bring into effect the PR stoneware wearing the belt of the vehicle seat. Warning Never leave children unattended in the vehicle and never allow children to have or use the key. Children can be able to start the vehicle or move the vehicle to Nevre. There is also a danger that children can heal by playing with windows or other vehicle features. Furthermore, heat accumulation or extremely cold temperatures within the vehicle can be fatal for children. Page 54 of 568541-1. For safe use Camry U (OM33D37U) Studies have shown that the installation of a bother for children on a back seat is much safer than installing one in the front passenger seat. A   - Choose a kids retention system suitable for your vehicle and is appropriate for the age and size of the child. A, - For installation details, follow the instructions provided with the kidney retention system. General installation instructions are provided in this manual. (A, ~ A A@ P, 58) Keeping systems for children A kids retention system for a small child or a child must be properly retained in the seat with the lapter berths or the portion of the lap belt ride / shoulder. The laws of all 50 states of.a. And Canada now require the use of kidney retention systems. Points to remember page 55 of 568551-1. For safe use 1 For security and safety Camry U (OM33D37U) Keeping systems for children are classified in the following 3 types based on age and child size: A   - Selection of a kidney restraint system Appropriate a to use a kidnapping system for appropriate children for the child until the child becomes big enough to properly wear the belt of the vehicle seat. A   - If the child is too big for a kids retention system, sit the A  
