In todays article Im going to take a detailed look Studio 5000 pricing, available packages and bundles, and what features are included with each as it stands today. Studio 5000 Logix Designer only programs the CompactLogix family of controllers, and only in the Ladder
Logic programming language. Officially, Rockwell states this and all editions of Studio 5000 also includes View Designer (for PanelView 5000 HMIs.) Below are the current prices

In more recent years, Studio 5000 Standard and higher now comes with a copy of RSLogix Architect (PN# 9326-LGXARCHENE,) and all editions of Studio 5000 include View Designer (for PanelView 5000 HMIs.) While you can purchase many of the other languages (FBD, SFC, ST, Safety Editor, etc.) separately as add-ons, I recommend looking at the next package, RSLogix 5000 Full, before making a decision as it will likely be the cheaper option. Below are the current prices for Studio 5000 Standard as found on Rockwells website in December of 2022. Note that if you need versions prior to 20.05, youll need to purchase the more expensive Legacy edition.
