Black Clover is a series of manga of Yūki Tabata from Japan. The plot concerns Asta, a young boy who seems to be born without magic, in the universe where he lives. Auction plans to become the new king wizard with his friends from the black Bulls. Auction and Yuno have been abandoned together in the same church, and have been inseparable since then. As children, they promised they would compete against each other to see who would become the next Emperor Magus. However, when they grew up, some differences between them became simple. Yuno was a genius with magic, with incredible power and control, while Asta could not use magic at all, and tried to compensate for his lack by training physically. When they received their Grimoires at the age of 15, Yuno got a spectacular book with a quadrifoil (most people received a clover), while Asta received a clover of five leaves Grimoire, a "blackclover"! Now the two friends are going out into the world, both looking for the same goal! In December 2020, Crunchyroll revealed that he had added the top 10 most famous animals per country and area between July and September of the same year and that the black clover had the most seen anime rating in a total of 19 countries, including the United States and Aust.
