January 10, 2017 Version 2.17 This app has been updated by Apple to display the Apple Watch app icon. - Bug fixes Thanks for the comments you share with us, we really appreciate your feedback and are always working to improve the app. If you liked the update, you can rate it or leave a review in the App Store. Hello! I have something to say. Whenever I try to get a skin it won't let me get it because when I click the skin I want to download the app and I hate it because I NEED MY FIVE NIGHTS AT FREDDY WITH SKINS so try to solve this little problem because I really want new fnaf skins because I have minecraft for the third time because I have a new ipad, then I have my apps and games, but then I have my own apple id, then I have have apple id i reset everything on my ipad and now i have minecraft again now i cant get five nights freddy skins. So try to fix this hang. I also love your app. I find this app very easy to use and has a huge selection of skins. It was perfect at first, but it got a little stuck from time to time, which wasn't a problem. This caused me to get a lot of skins due to my excitement over all the skins I could choose from. I had no idea there was a limit on the number of skins I can use. After a while I decided to make my own skin and fell in love with it. (it was also very easy to do!) However, I couldn't use it because I "used up all my skins". I even deleted a few thinking that if I delete some I might have more skins, but all I did was delete some of the old skins I had. Also, I only have one favorite skin that worries me a lot. To solve these problems, you will have to spend money, much more than some Minecraft skins should cost. overall this app deserves 3 stars. Why should you pay to find the right skin? If you're not looking, you'll have to scroll down and down to find the image you're really looking for.part is better but why do we have to pay?! Please change it because I just want a good skin without having to spend hours searching for it.ð And also when I try to modify my skin with a patch. The button freezes and when I try to edit professionally it freezes as well. It's really annoying. ð€ Could you fix it for me? Thanks Developer KISSAPP, S.L. did not provide Apple with details of its privacy and data processing policies.
