How old is locksmith the rapper

I love rap music. Biggie, Kanye, Drake, Jay Z, Wale, Lil Durk, Iamsu, Wiz and many other rappers fill my head every day. I love beats, flows, but above all I love the inspirational texts. One day I dream of writing a rap book philosophy on all life lessons embedded in hip-hop and their evolution over time. I got my first CD rap when I was 8 – my babysitter loaned me her Biggie CD before she went to college and never asked to come back. As it sounds crazy, I learned a lot about personal finance, and life, from rappers over the years. Let's take a look at some of the best personal finance lessons from rap texts. Let's start with the Big Poppa himself. 1. Notorious B.I.G/Biggie Smalls “Damn right I like the life I live because I went from negative to positive.” Biggie is the best rapper ever. Period. He also taught me a lot about money at a young age. His story is legend. Biggie was one of the, if not the first rapper, who went to drug trafficking in the streets to multimillion rapper in a few years. He was also one of the first rappers to truly glorify his rags to the history of his music. His music is a celebration of his hustle and success. His songs are ambitious and stimulating. They're still relevant. A large majority of Millennials and all Americans are still in the “negative”. 72% of Millennials have less than \$1,000 saved in their bank accounts and fell behind. But the key to unlocking financial freedom is to escape live paycheck for paycheck and get positive. This is where you can really live the life you want. I mean, who can forget this gem, “Super Nintendo, Sega Genesis, when I died broken I couldn't imagine it.” Super Nintendo is the OG. Biggie also taught us that the key to unlocking wealth is to follow our hearts. And that making money and finding joy comes from doing what you love. A fact that always blows my mind is that Biggie was writing these raps when he was 20 and died at only 24 years. His wisdom was far beyond his years. Shares of money Biggies and personal finance lessons: Get out of debt: “Damn right I like the life I live because I went from negative to positive.” Your passion and money will follow: “Stay away from shy and make only moves when your hearts in it.” More money brings more problems: “I don't know what, they want from me, it's like more money than we encounter problems the more we see.” You have to change and evolve: “We cannot change the world unless we change ourselves” Do not stress too much about money: “Learn how to treat life best, put stress to rest.” Invest in a 529: “Take a better position. Put the money in my mother's hand. Take my daughter this college plan, so she doesn't need any man.” 2. Kanye West “ Having money is not all, not having itKanye has some pretty deep insights on doing, saving, spending and building wealthIts albums. Who knew that Kanye was a guru of personal finance? The first time I heard this line in the Kanye song “Good Life”, FT. T-Pain, I set it to repeat and listened to it at least 10 times. This is one of my favorite songs and easily one of Kanye's best. Mr. West is right, there is more alive than in cash when you have some, and but the money seems to be everything when you don't. Seriously, he lets you system. When you listen through Kanye albums, model a rag similar to travel riches like biggie, but with a more self-conferent journey. Kanye money quotes and personal finance lessons: there is more to life than money: â € à € œthe we hide on a living waste, they say that the best things in life is freeâ € to pay attention there is a lot of avidity at the top: “It seems that we live the American dream | But the higher people got the lowest self-esteem | the most beautiful people do more ugly things | for the road to request and diamond rings.” Treat yourself and have fun: â € œI remember that I could not afford a Ford Escort / or even a four-track recorder / so it's right that I left the upper drop on a drip porsche | It's for you, that's important.â € Money can't buy your happiness: â € œThe hell is alive I hear you breatheâ € ~ | Claim money is the key, so he continues to dream | And put lottery tickets just to take care of it.â € don't spend too much money: â € œIvoglio act Balerific how it's all fantastic | I have a couple of past-two bills, you will not get specific | I have a problem with spendin before you get it.â € Remember where you started: â € œFore that someone wants K. West beats | Me and my girlfriend divided the buffet to the kfc.â € 3. jay z â € œVendo ice in winter, I sell fire in hell, I am a child hustler, I sell water at a wellâ € Jay Z is another leakage from Brooklyn Drug that comes rapper, who rapes a lot about the realization. It is also uniquely the first rapper that has turned into a huge brand. He is not just a rapper, it's an investor, a Mogul. Jay. Z Also approves a ton of products and gets sponsorships. He is not only a brand, but he has married Beyonce that he is the brand of him. Jay. Z is a real hustler and redefine what it means to be a mogul in today's environment. For those who want to be an entrepreneur you can learn a lot to listen to the music by Jay Z. Jay Z Prevents of money and personal finance lessons: creates side obstacles: â € à € œVendo ice in winter, I sell fire in hell, I am A child Hustler, I sell water to a wellâ € Build your personal brand: â € œIn I am a businessman, I'm a business, a man ... â € œ My mind on my money, the money on my mind if you owe me ten dollars, you won't give me nineâ € you know your market: â € œo scisso my audience to double my The compound interest is fundamental: â € œThings already, turns on are heavy scroll, heavy pasta. MIC spooled your flow, your card falls slowly as confetti. Mina A constant growth.â € Risks: â € œIn I'm afraid of I'm afraid I won't try Drake “Oh, well, I guess you win some and some lose, as long as the result is a gain.” Drake, notoriously, made \$25 million when he was 25. The ex-actor-turned rapper has been a huge hit since the day he took the microphone. The singer, notoriously philosophical and self-aware, tends to overly analyse all aspects of his life in his songs. While not going from rags to riches, he sang a lot of money and tried to do as much as possible. But, like all of us, Drake is struggling and fighting that he has to hurry so much, because money can't buy you time. I have always enjoyed Drake's deep thoughts and everyone should be more self-aware when it comes to yourÂ relationship with money. DrakeÂ Quotes and lessons in personal finance: Diversification leads to wealth: Â“Oh, well, guess a little win and a little loss, as long as the result is incomeÂ” Keep working hard and saving: Â“I just played, I didn't know I was winningÂ” Don't let Money changes you: “I like it when money makes a difference, but it doesn't make you different” “Money can't buy you time (and time is more valuable than money): “What's all money if it doesn't buy time?” 5. I have a dollar, as long as I have my heart, I can get everything over. “Wale is a conscious rapper who tells the truth in all his albums. I love the juxtaposition of light and heavy topics in his music. He is also one of those rappers who is ostentatious, but also avoids wealth “as Drake trapped between wanting, but not wanting, more money. A lot of rappers ask this question “when is enough?” But nobody does it better than Wale. WaleÂ Quotes and personal finance lessons: It is natural to have a love/hate relationship with money: “Music full of relevance and money” overrated. That's why I spend it like I'm looking at it with hate. Don't focus all your energy on making money or trying to become famous: “He took my mind off the money. I don't care about fame, and I pray it never changes. “Family is everything and money is less important. Â“Be meaningful and build something unique: Â“I'm tired of making money, I'm making historyÂ” Â“Be smart with the money you make and keep building: Â“Do the least of your hatersÂ” Make the most of your money. Keep this guidance constant as long as your engines are running.Almost every exterior door in the world has a lock, and sometimes when the locks are broken or the keys are lost, you need a locksmith. The locksmith industry is a small and constantly in demand, regardless of market fluctuations and technological changes. Read the tips listed below and learn about how you can become a Training While becoming a locksmith does not require formal education, it requires extensive training and become a certified locksmith. Courses include hand-key study, lock collection, secure combination change, code cutting and corporate organization. Depending on where you live, apprentices can be up to four years, but they are paid [source: choose a lock.] certification getting certification is not a legal requirement in the locksmith industry. However, getting certification will provide you credibility and increase your gain potential. associated locksmiths of america (aloa) administer certification exams and grant a number of names, including registered locksmith, certified auto locksmith and certified master technology [source: aloa.] personal characteristics there are a series of features and skills that you should possess if you want to be a successful and in-demand locksmith. you will need mechanical know-how, excellent hand eye coordination and exceptional people skills. being a locksmith is so much about the formation of relationships with people as it is about locks [source: lga.] if locks and safety boxes are something you care about, consider becoming a locksmith. It is a career that allows you to be autonomous with the flexibility to create your hours and the ability to move to another city or country and continue your profession. profession.
