Tiny Dancer - Elton John (1971) Most of The Old Gray Whistle Test was devoted to cutting edge music, but they did occasionally throw in the odd pop star. In 1971, the series welcomed Elton John... but not as we knew him. The clip presents a decidedly different image of Elton, a tense and subdued man, and feels more like an audition than a performance by the legend. It's a great window into his raw talent and gives you a glimpse of the artist behind the costumes. This strong performance is a far cry from the mere vaudeville character that would follow in the years to come. His sequined jacket and rectangular sunglasses are tame compared to his grandiose image we have today. It's just Elton, a piano and a stripped-down version of "Tiny Dancer" that made him a superstar. Horses - Patti Smith (1974) The legendary Patti Smith travels to the legendary OGWT studios not only to play the title track of her then and now influential album Horses, but also to appear on television in 1974. The band was the epicenter of the well-known Two-Tone movement and worked together with their compatriots Madness and Selector for the unity and understanding of the breeds. In 1979 they sent their message on national television when they took part in the Old Gray whistle test. It is a performance that Togwt confirms as the forerunner of the youthful subculture of the era. A Rhiannonà / GO YOUR OWN Way to Fleetwood Mac (1977) Fleetwood Mac's appearance at OGWT, which performed a track from her self -titled album from 1975, could have been given to her performance of à Rhiannon. The song receives a high -quality bonus with Nicks always impressive vocals, together with a short anecdote about how it wrote it. The film material below actually comes from band -led samples that someone Nicks did not want to say, which ensures an exciting performance. There was also the debut of her new single Lindsay Buckingham-Penned's à Go Totse Way. The song was not only a synonym for the immense talent and the success of the band, but also for Fleetwood Mac's increasingly disputed relationship. It is no surprise that you can see Stevie Nick's eyebrow in the first moments of your trip, even with a high -quality film from the 1970s. Donner, if necessary and shows why Nicks will be a double rock and roll Hall of Famer. (1980) Public Image Ltd. is a completely underrated group. While the post-sex gun project of John Lydon has always been a difficult transition, he saw an undeniable influence on music. Much of their influence can be traced back to this performance in the legendary British music show The Old Gray Whistle test, stage where Lydon and his band gave their breakthrough portrayal "Poptsy" and his career "in 1980". The second performance of the group was another highlight of the new album and another tasting of the experimental electronic sound, which was to come in the coming decade. He drank another poetic performance in his career, where Lydon even reads lyrics directly from the cover of the album (still marketing leader). In the United Kingdom, the group was already adored at Entre Entre Days - it became the ninth hit of the band and the fourth consecutive top 20 single. There was something special about this medicine, which made them feel like foreigners from a small town, which provided the band a connection with fans that did not resemble anything that could offer American bands. The appearance and sound of The Cure were contrasting and their beautiful sounds were the opposite of what you would expect from the band led by Robert Smith. Between Days is one of their definitive songs and is almost impossible to listen to it without smiling. This live version of the old gray sanding test is the perfect way to instantly increasemood. mood.
