Peter Schaufler, who owned the company for many years. It enables application-oriented training courses under realistic system conditions and, with its wide-ranging program of seminars, makes an important contribution to the training of specialists in the refrigeration and air-conditioning sectors. Dates of individual training courses can be found at the following link:SCHAUFLE Academy The challenges within the refrigeration and air-conditioning industry are diverse, which is why the solutions must be, too. With its large portfolio of products and services, BITZER offers the right solutions for any application.
