Carolus online academy

The transition to middle school is a pivotal moment in a student's educational journey, as coursework becomes increasingly challenging and demands more engagement without feeling overwhelmed. At Carolus Online Academy (COA), our approach focuses on unleashing each child's unique potential by identifying their strengths and interests. With online learning, students can study from the comfort of their own homes or any location with an internet connection, while benefiting from a structured school program. They will complete both online lessons and offline activities using K12-provided materials.* Our virtual classroom sessions, called "Class Connects," are led by state-certified teachers who provide instruction and support. COA also hosts Q&A sessions where parents can interact directly with teachers to share concerns, gain insights, and foster a collaborative approach to their child's education. We utilize high-quality curriculum from K12 that allows students to discover the learning style that suits them best, empowering them to chart their own path to success. Each online classroom offers engaging lessons that build real-world skills tailored to the student's interests and abilities. Starting in 6th grade, students begin exploring future career options through specialized courses. As Learning Coach, parents play a vital role in supporting their child's education by providing academic guidance, motivation, and daily communication with teachers. COA is part of the public school system, making it tuition-free for students and families in South Carolina. While we provide licensed teachers and materials,* some common household items (like printer ink and paper) are the responsibility of parents. Our enrollment consultants can assist with technology-related queries. In younger grades, a balance is maintained between online and offline activities. Students spend approximately 30-40% of their time on computers in K-2, increasing to 50-60% in grades 3-5. By middle school, most learning shifts online, with hands-on science experiments, reading, and math problems completed without computers. Our staff works individually with students to create a personalized schedule that meets their needs for live class sessions and offline activities. We believe in achieving a balanced education through technology's effective facilitation rather than replacement of traditional teaching methods. Computers provide essential tools for assessment, planning, and time management while motivating and informing children about the world around them. However, a solid education remains indispensable, which is why we prioritize it at COA. At Carolus Online Academy, students enjoy a unique multimedia approach that combines traditional books, workbooks, and instructional materials with online interactions through clubs, school outings, field trips, and other activities. This holistic approach fosters connections among classmates and provides opportunities for students to engage in shared interests and passions through K12 online national clubs. COA's online school is buzzing with exciting events, offering something for every student. Whether you're a bookworm or an activity enthusiast, we have a wide range of engaging experiences waiting for you! Our virtual events will ignite your curiosity, foster connections, and fuel inspiration. Join us live from South Africa to explore the African Penguin and Seabird Sanctuary, learn about conservation efforts, and get up close with endangered birds. Next, dive into the world of collegiate esports as we play Super Smash Bros. Ultimate, discussing strategies and gameplay tips that'll boost your skills. You can also catch a Valorant match, where skilled players face off in an exciting display of team strategies and agent combos. We're also celebrating World Turtle Day with Clearwater Marine Aquarium, learning about the importance of sea turtle conservation and getting inspired to take action. Moreover, explore the fascinating world of jewelry-making at the Norton Museum of Art, discovering stories behind forging precious materials and meeting distinguished artists who mastered their craft. Get an inside look at Ava's family farm, home to 52 animals, on our K12-powered virtual field trip. Don't miss this opportunity to show off your creativity in the Reel Me competition, where you can win amazing prizes by creating a one-minute video that showcases what you love about online school! COA families reap many benefits from online schooling, far beyond just convenience. Although each student's experience with a personalized education is unique, some key advantages for COA families include having control over their learning environment, allowing students to work at their own pace and adjust the amount of time spent on topics based on their individual understanding. This flexibility also enables families to balance online schooling with other commitments such as work, extracurricular activities, or family responsibilities. Online learning brings together students from diverse backgrounds in virtual classrooms, facilitating idea exchange and perspective broadening. Furthermore, it enhances digital literacy skills, a vital competence for the modern workforce. At COA, we prioritize creating a safe learning environment by promoting kindness daily. Join our nationwide community of students and families who are part of the Be Kind 365 campaign by following, liking, and subscribing to our social media channels. Our dedicated teachers provide instruction and support as your child navigates the curriculum, maintaining open lines of communication through regular updates. Additionally, you'll receive textbooks and hands-on education materials delivered right to your doorstep, which complement the interactive online components and vary depending on grade and course.
