Description Product details Dad's day delivery Click on the cover image above to read some pages of this book! Identity, writes Erikson, is unmistakable as all pervasive. It deals with a process that is both individual core in the core of the municipal culture. © Because the culture changes, new types of questions of identity arise-Erikson comments, for example, on social protest issues and changing gender roles that were special in the 60s. Representing two decades of revolutionary work, the essays are not so much a systematic formulation of the theory as a relationship that is evolving clinical and theoretical. Subjects range from the "creative chaos" in two famous lives: the playwright George Bernard Shaw and the philosopher William James, the connection between the individual struggles and social order. "The race and the wider identity" and the controversial "femininity and interior space" are included in the collection. Essays on the psychology, based on written documents from 1951 to 1967, from a well-known neo-Freudian analyst and theorist. The arguments are resonant and heavy 'theory and ideology, "' ego Pathology and historical change ", " the group identity and ego identity "and so on, in permutations of the concepts that have preoccupied Erikson in young childhood and company, and Intuition and responsibility. The essays on totalitarianism and race are of particular interest. The book is an elaboration of his earlier studies, not a distinct progression: there are no major conclusions or approaches. Erikson tries to clarify what he calls "the appeal unique and often irregular audience that the terms" identity "and" conflict of identity "have had over the last two decades" - un'impresa useful. As for the "story" here it means primarily the story of life in different times and places, seen through the complexity of cultural influences and the phases of the life cycle that Erikson continues to investigate. The book is not better organized than we would expect in a renewed collection of documents; The style of Erikson's still civilized and safe, but perhaps a little 'tired. The essays will have limited interest and intelligibility for those not already familiar with the work of him. It's unlikely to become a classic like luther, provides a useful gloss His other books and adumbrates key areas for future study. More ... I really enjoyed this book. It 'was the first book of Erik Erikson I read and was very impressed. It 'was written in the United States in the sixties and since you compare with what was happening at the time (alienation of youth, the consumption of capitalism, racial issues, etc.), may seem a bit' old fashioned. However, I think there is much wisdom in this book. Erikson explores the many dimensions of the issue of identity so profound and fascinating. And 'far from a standard piece of writing psychoanalytic Insofar Erikson is very concerned about social issues, cultural and historical, in fact, one of the things that I think is trying to do is connect with psychoanalytic insights problems beyond the individual and the nuclear family. That said, there are also some interesting perspectives on psychoanalysis - I found his vision childhood and infancy stages (including versions of traditional Freudian libidinal phases) very interesting and although as a man I hesitate to say, I thought his essay on post-Freudian femininity and space inside was very powerful. So overall I'm really glad I read this book and certainly read a bit 'Erikson two courses to see how his other stuff in comparison. Diamond ... A reading for psychology majors. Excellent book on the development of identity. Erikson exposes the crux of his argument would then develop as we think of identity in psychology. Book amazing. The many insights about the formation of identity are very interesting. He leads wisely nature of identity training, Erikson, and the theories of him, continue to be omnipresent in even the most Psychology schools (for example psychodynamic thinking and social-cognitive work). This book, in particular, inspired the thesis of my teacher (to emphasize the impact on me as a reader) and will develop in the rich and fascinating field of adolescence and how we develop during the transition to adulthood. I should find the English translation to read at some point in my life. The Chinese one is horribly translated. Why didn't we have progressed beyond this?
