

Click to prove
you're human

The BioDigital Human platform offers an immersive and interactive 3D experience of the human body, featuring over 8,000 individual anatomical structures, 850+ simulated health conditions and treatments. Users can explore 3D anatomy or create immersive experiences with their fully embeddable, cloud-based software available in eight languages on any desktop or mobile device. BioDigital XR offers a comprehensive platform for interactive 3D anatomy exploration, featuring a vast library of immersive models, redesigned tools for optimal user experience, and optional audio narration for enhanced engagement. With over 20 years of expertise in biomedical engineering and 3D medical animation, BioDigital provides a standardized rich media 3D environment for learning anywhere on any device. Over five million learners and experts have trusted BioDigital to grasp their health. Our team has meticulously cataloged over a thousand different health conditions, with new additions every month. Last year alone, we played a pivotal role in facilitating more than 100 million health discussions worldwide. Moreover, an astonishing 96% of our users concur that the visualizations provided by BioDigital's software greatly enhanced their comprehension of presented information.
