Axxess aswc-1 harley install

| 1 METRA. The best boys in the world. COPIAT 2017 METRA ELECTRONICS CORPORATION 10/12/2017 aswc - INSTALLATION INSTALLATION ASWC-1 INTERFACE FEATURES An interface does everything - No additional interface needed to be compatible with all major radio brands Auto detects vehicle type, radio connection, and presets control the ability to assign two steering wheel control buttons can be manually programmed for most Memory vehicles keeps settings even after battery disconnection or interface removal All connections made in the radio position Micro B USB updata ble INTERFACE COMPONENTS ASWC-1 Interface 12-pin with female connector with Brown and Brown/White REQUESTS Criming tool Tape Axxess Monitor Wheel Control INSTALLATION Manual ASWC-1US. Patience. NOS. 8014920 and 8214105 Table ContentsPreface. 2 3 General introduction to the ASWC-1 interface and the Wiring Harness interface. 4-5 ASWC-1 INSTALLATION connections to realize 6-7 Programming Automatic detection mode 8-9: Overview. 8 Automatic detection mode: steps. 8-9 Remote control of the SWC buttons (wheel control) and 10-11 Button Assegnation Legend. 11 Edit of the radio type. 12-13 Radio Legend. 13 Instructions for two square allocation 14-15 Dual assignment legend 15 ASWC-1 Difficulty Automatic detection mode. 16-18 Manual programming mode. 19-21 Programming Manual 21 Restores original ASWC-1 settings. 22 LEDs: Metra recommends disconnecting the negative battery terminal before starting any INSTALLATION. All accessories, switches, and in particular air bag indicators must be connected before reconnecting the battery or pedaling the necessary know before you start) Know the correct year, brand and model of thethat the steering wheel controls work before removing the factory radio, and know what the Volume Up button is. 3 The Volume Up button is used for programming, so knowing before removing the radio is crucial. Note: The steering wheel controls must be: those who came with the vehicle when purchased. We do not support custom work by adding a new flyer with / new) Go to the AXCESS website () and click on the link entitled Instructions for ASWC-1 vehicles, which is located on the right side of the screen in the middle. Once you have entered the vehicle information, click the Send button. This will take you to another page, where you would then click on the link below the word documents. This will provide specific vehicle instructions for your vehicle. Print this document so that you have it with you in the vehicle during installation as it is the best and most recent source of information. 4) Make sure the Radio Note: to update Go download and download WebXXPress: Although we have done extensive research and tests to verify that the steering control wires we list are correct. It is your responsibility to check the steering control wires we list are correct with a multimeter. If you find an error, please notify our Axxess Tech department to 1-800-253-Tech. Please be in the vehicle, parked, along with access to the interface and wiring of the vehicle when you are wiring the ASWC-1 interface, The top of the ASWC-1 interface has three points of interest: 1) LED2 Programming) Reset Button) Update door cover (slider to open) Panoramic Panoramic Door Coverreset Button * LED Programming* Note: the reset button is to be collected. 5 An element, such as a partially opened graffiti, is necessary to press the BrownShown USB5 Panoramic underneath: female connector with brown (BR) and Brown / White (BR/W) above: 12-pin Pin-Pink male Pin-2 White / Green Pin-3 Yellow / Green Pin-4 Green / Orangepin-5 Grey / Red Pin-6 Pin-6 7 Blue / Pin Pin-8 Black / Green Pin-9 red (Connector Point) PIN-10 White (Ring) Connector) Pin-11 Gray / Blue Pin-12 RedBelow is wire threadfor the ASWC-1. Visit the Axxess site for detailed information about your specific vehicle and for which colored wires to use with ASWC-1 InstallationConnections to run once you have collected or printed the ASWC-1 INSTRUCTIONS of the vehicles for your particular vehicle, from, you are ready to install the ASWC-1. Note: If wiring is not available on our website for your vehicle, you will have to get it yourself. 6 Please check first with Axxess Tech Support Department of 1-800-253-TECH, as we can have this vehicle:1) Connect the black wire of the ASWC-1 to the ground. You can use the same starting point as the post-market radio; but it is highly recommended to ground the ASWC-1 to the chassis, of the vehicle, from) with the key in position off, connect the red wire of the ASWC-1 to the 12-volt accessory) Locate the correct steering control wire(s) in the vehicle frame, as described in the ASWC-1 Connect these wires to the ASWC-1. Note: Metra recommends that the wires are welded for the best and safest connection. Tap-style connectors are not recommended due to an increased probability of intermittent connection or a change in the strength values (which will cause the lack of ASWC-1.7 Radio: 1) for the radios listed below, connect the included female adapter (with Brown and Brown/White cables) in the ASWC-1 male connector for Eclipse radios: Connect the control wires of the Eclipse steering wheel (normally brown and brown/black) to the brown and brown/white wires of the ASWC-1. Brown from ASWC-1 goes to Brown/Black from Eclipse and Brown/White from ASWC-1 goes to Brown of the InstallationConnections to be MadeB. For OE Metro radios: Connect the control cable of the Key 1 (Gray) steering wheel to the brown wire of the ASWC-1. Isolate and seal the brown/white wire, will not be for Kenwood, neither © select IC with a cable of blue/yellow wheel: connect wood/JVC wood/JVCWheel control wire to brown wire of the ASWC-1 . Isolate and plug the Brown/White cable: Some of the newer Kenwood radios will be automatically detected as JVC.8 In this case, manually set the radio type, refer to the Changing Radio Type section (pp. 12-13).Q. For XITE radios: Connect the SWC-2 cable of the radio's Flying Control to the Brown Cable of the radio. WC-1. Isolate and plug the Brown/White cable, it won't work) For Asteroid Parrot Smart or Tablet: Connect the jack of the ASWC-1 to the female jack of the AX-SWC-PARROT (sold separately). Then connect the 4-pin male harness to the corresponding female steering wheel control harness in the radio. Note: AX-SWC-PARROT is required (sold separately) and the radio must be updated to RPM or higher. Also, the ASWC-1 needs to be updated to the latest software.) For all other radios: Connect the ASWC-1 male connector to the back of the aftermarket radio, which is designed for an external steering wheel control interface. Please refer to the Aftermarket Radio Handbook if you have any questions about where the ASWC-1 connector goes.The ASWC-1 connector can be programmed in two different ways.9 It can self-program via Auto Detect Mode, or it can be programmed manually (pp. 19-21). The following is recommended for auto-detection mode: OverviewThe ASWC-1 has the ability to automatically detect selected vehicles and which aftermarket radio it is connected to. The ASWC-1 Vehicle INSTRUCTIONS , found at , will indicate whether the vehicle will automatically detect and what action, if any, is required for this process. In order for the automatic detection function functions there are (3) possible actions to be taken. Note, only one action will be required depending on the vehicle:1. Turn on the ignition and no other action is O---2. Turn on the dashboard, press and hold the Volume Up button on the --- or --- 3. Turn on the instrument panel and repeatedly touch the VOLUME UP button on the steering wheel. Automatic automatic detection Note: Please read all the steps in auto-detection mode before) Complete the connections to the vehicle and the rear market) Turn on the ignition, the LED will start flashing red rapidly: Which means ASWC-1's looking for the vehicle and the radio. 10 Note: If the LED has not started flashing red press the reset button for three seconds and then proceed to Step) Do the required action for your vehicle, as indicated in the ASWC-1 Download from InstallationProgramming94) After a few seconds the LED should stop flashing quickly and go out for about two seconds. At this point do not press any) After the approximate two seconds there will be a series of 7 Green flashes, some short and some long. The long flashes represent the wires recognized by ASWC-1. Tip: Know that this will help if you need to solve problems; refer to Fr. 22, for the appropriate LED section) The LED will stop for another two seconds, and then flash red up to fifteen times depending on the radio connected to the ASWC-1. Tip: Know that this will help if you need to solve problems; refer to p.
