Zoho analytics reports

Schedule reports in zoho analytics. Sharing reports in zoho analytics. Zoho analytics sample reports.

To access this option, open the dashboard in the Edit Design mode, click the Options button of the specific report, and select the Show Report Specific User Filter option. Include/Exclude Dashboard Filters: When you want your reports to remain unchanged regardless of the filters applied in the dashboard, you can easily exclude the user filters from being applied on a specific report using the Apply Dashboard Filters option. You can easily create a visually rich and interactive dashboard by adding reports, widgets, user filters, and rich-formatted text. Analytics Plus supports a wide range of chart types such as Area, Line, Bar, Stacked, Pie, Scatter, Combination, Funnel, Web, Map, etc. You can also add KPI Widgets, which are single numbered or chart type widgets, to your dashboard to highlight any key metrics. Analytics Plus also offers a wide range of options to customize dashboard design and create a visually rich dashboard quickly. Whether you're looking for a step-by-step tutorial or a quick how-to video, you're in the right place. Our videos will help you get started with Zoho Analytics and guide you on using our important features. ¿Desea saber qué proyecto está bien encaminado y está generando los resultados deseados? Acceda sin problemas a una completa herramienta de inteligencia comercial dentro de su cuenta de Projects. For example, a report on the details of requests raised in the current month.The following video explains how to create pivot and summary views in Analytics Plus.Working with DashboardsA dashboard is an effective way of organizing reports into a single page for quick insight into key metrics. The intuitive drag and drop based interface of Analytics Plus allows you to easily construct the required report. This option is available only in the Edit Design mode. Show Report Specific User Filters: This option allows you to apply filters on a specific report without disturbing the other reports. Puede crear con facilidad un sinfin de informes, como estados del proyecto, gráficos de uso de recursos, horas utilizadas e informes planificados respecto de los reales. Analice visualmente y elabore informes de proyectos intuitivos con la sencilla interfaz de tipo arrastrar y soltar, y conozca al instante sus indicadores clave de rendimiento para gestionar de forma proactiva la ejecución de sus proyectos.¿Le gustaría tener una copia impresa de sus informes y paneles? De igual forma, puede programar recibir los informes automáticamente por correo electrónico. Integre los informes y los paneles de todos los sitios web, blogs y aplicaciones para mostrárselos a más personas.La integración de Zoho Analytics le proporciona más de 50 informes y paneles listos para usar. Le encantará Zoho Analytics y encontrará un gran valor en el análisis del rendimiento de su recurso más valioso: su equipo.Reorganice sus datos de la manera que desee. Analytics Plus offers a wide variety of reporting options such as Charts, Pivot tables, Summary views and Tabular views, which help you easily analyze your data and derive great insights. Proporcionamos las opciones de exportar e imprimir. Analytics Plus provides a set of preset themes, which can be customized to suit your needs. Show/Hide Report Title and Description: You can customize the reports in the dashboard to show or hide the report title and description. There are a wide range of customization options available, such as Colors, Legends, Tooltips, etc., that allow you to customize your chart. Some of the customization options are:Theme customization: You can apply themes to improve the look and feel of your dashboard. You can also filter the data required to generate charts using Analytics Plus' comprehensive filtering capability.The following video details how to create charts using Analytics Plus.Working with Pivot and Summary viewsA pivot and a summary report are both tabular representations of data.A pivot view is recommended for reports that include many fields, and for reports where you are trying to group the results based on certain fields. You can also organize the created reports into a single dashboard, for a quick insight.Working with chartsA chart is a visual representation of data that allows you to effectively analyze and interpret data. Dashboards can be created by clicking the +Create button from the side panel, selecting the Dashboard option, and using the drag and drop builder to add the required reports and user filters. Zoho Analytics le ofrece una imagen completa del progreso de su equipo mediante paneles intuitivos. For example, a report on the sales figures by category and product.A summary report is recommended for when you are want to list details. Ayude a todo su equipo a conectar los cabos y ponga esas perspectivas en práctica de inmediato.ComenzarReorganice los datos de su proyecto para generar informes y paneles detalladosCree más de 50 informes incorporados que muestren las métricas clave del proyectoIntegre los informes en sitios web, blogs y aplicaciones para mostrárselos a más personasColabore y analice informes con su equipo de gestión de proyectosCree una cultura de equipo en la que las perspectivas de los informes se pongan en prácticaLos datos de Zoho Projects se sincronizan de forma automática con Zoho Analytics.
